

Please leave satellite radio alone. Reject the NAB's petition 04-160. That petition is just another attempt of the big fish wanting to control the pond. Competition is the American way and if the local radio stations were really local there might be an argument, however only a few companies own the majority of the radio stations in America. How much control do they need? How much more control are YOU going to give them.

Satellite radio provides a service and programming that the extra large radio companies don't want to invest in providing to the general public.

Thank you,  
Schotsi Creech
